

A 20x20 grid with red dots forming a diamond shape. The dots are located at the intersections of the grid lines. The diamond shape is centered in the grid, with the widest part being 20 dots across and the height being 20 dots. The dots are arranged in a pattern that is symmetric both horizontally and vertically. The dots are located at the intersections of the grid lines, forming a diamond shape that is 20 units wide and 20 units high. The dots are arranged in a pattern that is symmetric both horizontally and vertically. The dots are located at the intersections of the grid lines, forming a diamond shape that is 20 units wide and 20 units high.
